Mohawk Color Copy Premium with i-Tone Uncoated Premium Text and Cover Paper Printing and Handling Hints

Mohawk Color Copy Premium with i-Tone Papers are easy to print on when following these simple hints. It is recommended to pre-test all printing procedures prior to press time to ensure the desired results are achieved.

Mohawk i-Tone: Mohawk has created the greatest variety of papers-coated, uncoated and textured-for beautiful digital color printing. Mohawk i-Tone papers are reliable, flexible, affordable and work cross-platform to transform ordinary documents into impressive communications on the HP Indigo, Xerox iGen3 Digital Production Press, Kodak NexPress Digital Production Color Presses, color copiers and offset presses.

Environmental: The electricity used to manufacture all Mohawk papers is offset with certified wind power certificates. All of Mohawk's virgin fiber papers are elemental chlorine free. All of Mohawk's recycled fiber papers are process chlorine free. Mohawk papers are acid free and manufactured in compliance with standards set for alkaline papers by the American National Standards Institute. For more information, visit www.mohawkpaper.com

Electronic Printing Guarantee: The Mohawk electronic printing guarantee ensures reliable performance in offset, laser and copy equipment. Mohawk i-Tone papers are specifically engineered and recommended for optimal results on digital color production presses.

Handling: Keep Mohawk Color Copy Premium with i-Tone products wrapped until the moment of printing. It is essential to let the paper acclimate, for a minimum of 24 hours - longer during cold weather - in the press room while still wrapped in mill packaging. Keep Mohawk Via products covered during drying, between passes and prior to any finishing work. Pressroom conditions should be as close as possible to 70 degrees, and 40-50% relative humidity.

Binding: Mohawk Color Copy Premium with i-Tone is suitable for all standard binding processes. It is important to plan for proper grain direction in all binding applications. Grain direction should run parallel to the spine for optimum results.

Additional Paper Applications: Foil stamping, engraving, embossing, die cutting, saddle stitching, perfect binding.
